

North Partner List

North products are truly open, both technically and commercially. Our customers include system integrators, manufacturers as well as building users.

System integrators typically resell our products either as a link between existing manufacturers' equipment, or as a complete building management solution. They will provide design, installation and configuration of our products.

Manufacturers typically resell our products as part of their product range, to provide a link to other manufacturers' equipment.

Gold Partners

We award Gold Partner status to select resellers that use our products as a fundamental part of their solutions. They are capable of both specifying and configuring our product range, and show a great commitment to a long-standing relationship with us.

Gold Partners can use the logo shown on the right.

Tech Partners

We award Tech Partner status to certain resellers in recognition of their commitment, training and experience using our products. Tech Partners are capable of delivering a wide range of projects, and will often specialise in particular disciplines.

Tech Partners can use the logo shown on the right.

TF Tull

Based in Watford, TF Tull have a large team of engineers able to take on a wide variety of projects, from large office blocks and shopping centres to apartment blocks and high-end domestic installations. TF Tull constantly shows a real dedication to quality in everything they do, we are proud to supply them.

North Product Skills

- ✓ ObSys
- ✓ Commander
- ✓ Zip

Over the last ten years TF Tull have completed nearly 200 projects with North products, making them one of the most experienced systems houses we work with.

Company Skills

- ✓ Integration expertise
- ✓ Commissioning
- ✓ Maintenance
- ✓ In-house panel building

Key Projects

Major shopping centre in Kent, with over 30 Commanders, 40 Compass points and 3 ObSys user interfaces.

Student accommodation on the South Bank, London. With hundreds of pulsed meters, a large network of M-Bus meters and electricity metering on Modbus. TF Tull have deployed a large Zip network and several Commanders to collect the live values for billing and monitoring purposes. ObSys software provides a graphical user interface for the system, along with data logging, analysis and archiving.

New-build school in Hertfordshire. TF Tull have used Commanders and Zip modules to control a large underfloor heating system which integrates with other HVAC controls on site.

Intelligent Controls (UK)

Based near Gatwick, Intelligent Controls (UK) have been installing and engineering North products to the highest standards since 2005.

North Product Skills

- ✓ ObSys
- ✓ Commander
- ✓ Compass
- ✓ Zip

Intelligent Controls (UK) specialize in the high-end domestic market, and have completed projects at prestigious addresses, from Mayfair to Notting Hill, working for luxury property developers such as Grosvenor estates, St James, and many more.

Intelligent controls have been heavily involved with the development of interfaces between North products and AV systems such as Savant, Control4 and Crestron.

Company Skills

- ✓ Integration expertise
- ✓ Commissioning
- ✓ In-house panel building
- ✓ Maintenance

Key Projects

Large luxury home in Mayfair, fitted with a full North BMS controlling the boiler plant and 71 zones of underfloor heating. The system integrates with a Daikin air conditioning and Crestron user interfaces.

33 high-end apartments in which Lutron lighting interfaces are able to control the temperature set-points in third-party HVAC controllers thanks to Commander.

Luxury home by Regent's Park, using Commander, Zip displays and Zip I/O to control underfloor heating and interface with Crestron.

Tyrrell Systems

Tyrrell Systems are our longest-standing re-seller. Based in Lancashire, but with a global reach, Tyrrell Systems are true integration experts. Their open-minded approach and love of a challenge makes them hard to beat for those projects that demand a little extra thought, and in some cases, bespoke development.

North Product Skills

- ✓ ObSys
- ✓ Commander
- ✓ Zip

Tyrrell Systems take on a wide variety of projects, from remote monitoring of telecoms and data centres, to large BMS installations in shopping centres and schools. Tyrrell Systems also have a wealth of experience integrating and managing fire detections systems.

Company Skills

- ✓ Integration expertise
- ✓ Commissioning
- ✓ Maintenance
- ✓ Remote monitoring
- ✓ Bespoke development

Key Projects

Manchester's largest shopping centre benefits from North's driver technology throughout. Tyrrell Systems have installed a large network of Commanders to integrate package chillers, air handlers, security systems, lighting and BMS systems into a single user interface.

A county council in the north-east of England can see the status of any fire panel in their estate via the network of Commanders. A central ObSys display shows a live map of alarms and faults across the councils' 70 buildings.

Remote monitoring system for a global telecoms provider across 55 sites in the UK. Each site has its critical infrastructure monitored by Commander and Zip modules. Door entry is also controlled using a hybrid of North and Tyrrell's own software. ObSys provides the graphical user interface at the company's alarm monitoring centre.

Sensible Heat

Based in East Sussex, Sensible Heat provide home automation products which keep energy use to a minimum while ensuring comfort for the home owner. Sensible Heat's engineers have decades of experience delivering high quality HVAC control systems.

North Product Skills

- ✓ Commander
- ✓ Zip

Sensible Heat have been using North products since 2006. They have installed many hundreds of Commanders to interlock heating and cooling systems, provide web pages and to control Zip display modules for user interaction.

Company Skills

- ✓ Heating controls
- ✓ Carbon reduction
- ✓ Integration expertise

Key Projects

Luxury house in Regent's Park. Sixteen Zip display modules provide the owner (a famous fashion designer) with an intuitive user-interface to control all of their heating and cooling systems. Five Commanders provide the intelligent link between heating and cooling, preventing the systems from 'fighting' and provide integration with the Crestron-based AV system.

Large house in Belgrave Square. More than seventy heating zones with a mixture of radiators, underfloor heating and comfort cooling are controlled by twenty-five Zip displays. Eight Commanders are used to co-ordinate the staged heating and cooling, and to provide integration with the Control4 AV system.

Large house in St John's Wood. The owner's large art collection is protected by a full museum-quality air conditioning system comprising five air handling units, forty reheat batteries, ground-sourced chillers, five boilers and a CHP engine. Zip and Commander manage the entire control strategy, and provide integration with the Savant AV system. ObSys provides maintenance staff with a full BMS user interface.
